

CONOR LENNON

PROFESSIONAL SUMMARY

I'm an aspiring computer scientist, a final year student pursuing Level 5 foundation degree in cloud computing, analytics, and security. Committed to continuous learning in computing, with hands-on experience in various programming languages and project development showcased at conorlennondigital.com. Long-term objective includes securing a position with a leading tech firm, contributing to impactful technological advancements.

Promoted from Team Member to Supervisor (July 2023) following manager nomination for strong performance and leadership potential.

Proven track record in team management and store operations, successfully leading diverse teams to exceed sales targets. Developed and implemented innovative strategies that enhanced efficiency and productivity, resulting in record-breaking sales. Strong leadership skills foster a collaborative environment, driving team members to achieve their full potential. Committed to continuous improvement and operational excellence in retail management.
